

Henry Account:
Have all your self-employed income paid into your Henry Account

Henry will calculate, deduct and pay all of your taxes immediately

After your taxes have been deducted, the remainder will be paid into your personal bank account instantly

The Henry App

In addition to calculating and paying your tax the Henry app has other features such as:

- submitting your tax return and BAS (if needed)
- providing quotes
- invoicing
- calculating expenses
- allocating funds to other account such as savings, super or investments.

You can also access Henry's team of accountants for advice!

Cost

It costs nothing to set up a Henry account.

Henry charge a 1% +GST fee on income paid into your Henry account.

The fees are capped at \$1,500 per year.

After you set up your Henry account, you can use the promocode GLOBALSISTERS for a \$10 credit to your account.

HOW IT WORKS

When you set up Hnry you enter:

💰 Centrelink income estimate

💰 Employment income estimate

💰 Any other income estimate

+

All business income comes through your Hnry bank account:

💰 Business income actuals

If these change, you would update the Hnry system

As this grows, you might need to update Centrelink

HNRY

Hnry calculates the tax owed based on your income estimates plus the business income

TAX PAID

Paid into your ATO account based on Hnry income estimate

SUPER PAID

As determined and set up by you during onboarding

OTHER ALLOCATIONS

As determined and set up by you during onboarding

YOUR PERSONAL OR BUSINESS ACCOUNT

The remainder is transferred to your bank account

Within a few moments

Note: Hnry accountants would reconcile your income and tax paid at the end of the financial year. If your estimates are up to date there should be no major surprises.
